Hi, Steve.

Libby has already approved creating a new Web site for the Upper Animas. Liz and I have a meeting scheduled tomorrow at 1:00 pm to discuss content for the page. Would you like to join us?

Thanks. This is helpful. I'll check-in with Libby when she gets back.

Libby will have to approve creating a new page in the present system, since it is not a Superfund site.

It won't automatically be included in the Site Progress Profiles of the new Superfund site Web regime, since it is neither proposed, final nor deleted. I don't yet know how we will get such pages included in that new system. At present they are pulled from SEMS based on those criteria.

Thanks Bill. Do we need to get any approvals/permissions before we create a new page in the new system, given the national effort to revamp all of the webpages?

This is no link, Steve, because the draft page I made for Upper Cement Creek was in the previous WebCMS, was never published, and no longer exists. Here is a PDF of what that page looked like.

Hi Bill – Could you let me know the link to the mock-up for the Upper Animas website?

Thanks,

Steve
